

# COMMITTED TO THE COMMUNITY

2017 Community Benefit Report

Wabash      Deaconess Gateway Hospital  
Posey      Vanderburgh      Evansville

## COMMUNITY HEALTH NEEDS ASSESSMENT

A new Community Health Needs Assessment was conducted in 2016. Hospital decision makers, community leaders, and members of the local collaborative used the data to prioritize significant community health needs in Vanderburgh and Warrick County.

### Vanderburgh County

Behavioral Health

Maternal, Infant, Fetal and Children's Health

Exercise, Nutrition and Weight

### Warrick County

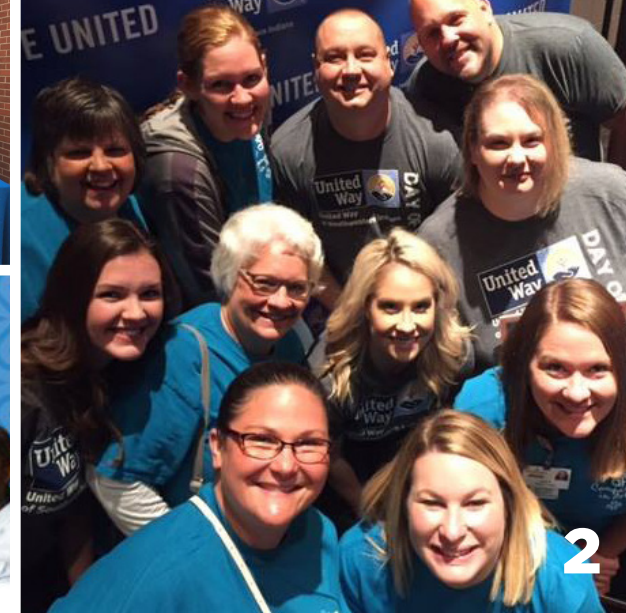

Behavioral Health

Cancer (*Breast and Prostate*)

Exercise, Nutrition and Weight

▲ 1. Strike Out Stroke at the Otter's baseball game; 2. United Day of Caring 2017; 3. Youth Mental Health First Aid USA

## THE FOLLOWING ARE EXAMPLES OF PROGRESS MADE DURING FY17 RELATED TO THE IDENTIFIED COMMUNITY HEALTH NEEDS.

### Behavioral Health Asset Mapping Report

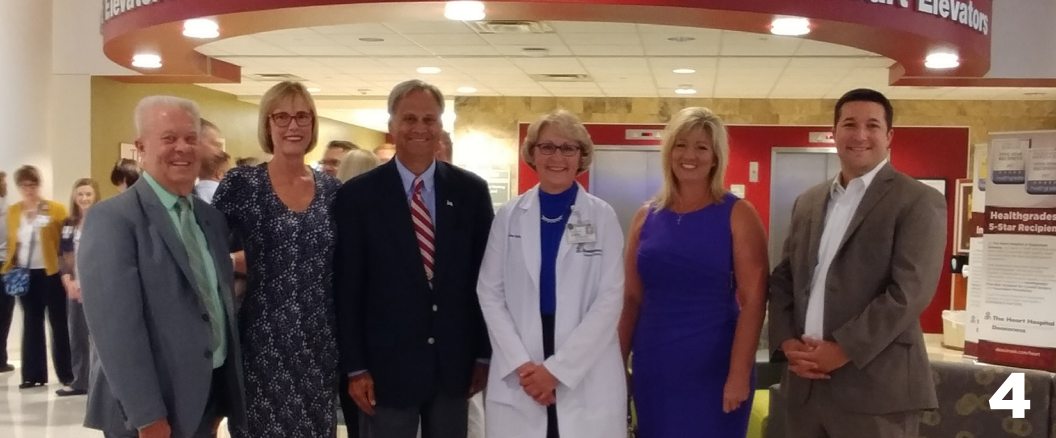

Research into the availability of regional behavioral health resources showed:

- The greatest need is for private residential treatment for teens (age 13-16). These are kids that need 24/7 care in a secure facility for several weeks or months.
- Medicaid is an advantage for the seriously mentally ill. Medicaid pays for more mental health services in general than commercial/private insurance.

### Youth Mental Health First Aid

In Year 2 of a local grant, the Southwestern Indiana Project AWARE

- Conducted 19 First Aider courses
- Trained 3 instructors and 330 "First Aiders"
- Made 576 youth referrals to mental health resources

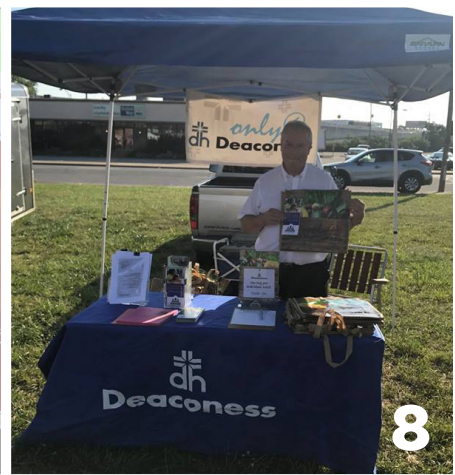

### Pilot Program for Statewide Opioid Initiative

Deaconess successfully participated in the first state-led pilot program to integrate information from the statewide prescription drug monitoring program (INSPECT) directly into our electronic health record (Epic). Putting INSPECT data directly in the hands of doctors making critical prescribing decisions will save lives and support efforts in the fight against prescription drug and opioid abuse. The statewide initiative is one piece in a broader strategic plan to provide a comprehensive, community-based approach to solving the opioid crisis.

### Infant Mortality

One of the 2016 CHNA goals is to reduce mortality before a baby's 1st birthday from the 2010-2014 Vanderburgh County average of 8.3 per 1,000 live births to the Healthy People 2020 goal of 6.0/1000 live births. Thanks to the great community effort, Vanderburgh County has seen a drastic decrease in the Infant Mortality Rate (IMR) over the past three years. The IMR peaked at 11.05/1,000 live births in 2013, decreased to 9.4/1,000 live births for 2014, 4.95/1,000 live births for 2015, and 6.2/1000 live births in 2016.

### Healthier U Walks

Deaconess Healthier U Walks encourage people to exercise and provide the opportunity to explore new places with the safety of a "tour guide" and a group to walk with. The program rotates through different trails or walking paths in Vanderburgh and Warrick Counties to help identify areas, new for some, for exercise in the community. For 12 Saturdays, May through July, individuals meet each week at a different park or walking trail and walk from 9-10 AM.

### Wise Choice

Deaconess collaborated with the West Side Nut Club to provide a "Wise Choice" Fall Festival munchie map. The Fall Festival in Evansville is known for deep fried and unhealthy food options. The Wise Choice map identifies food items that are determined by a dietitian to be low calorie, low fat, and low sodium. Wise Choice debuted in 2012.

The full 2016 CHNA and 2017 progress report can be found at [www.deaconess.com/CHNA](http://www.deaconess.com/CHNA).
