FAMILY MEDICINE  
RESIDENCY

## Meet Our Family Medicine Residents

### David Tran, DO Class of 2026

#### ABOUT ME

Hey there! My name is David Tran and I was born and raised in Rosemead, CA until the age of 11. My family relocated to Evansville, IN and this has been my hometown ever since. I attended the University of Southern Indiana where I majored in chemistry and ultimately worked with Mead Johnson locally as a chemist for two and a half years before pursuing medicine. I completed my master's in biomedical sciences in Blacksburg, VA and my journey with medicine took me to South Carolina for medical school at VCOM. I am excited to return to my hometown to complete my training.

#### WHY CHOOSE DEACONESS?

Evansville, IN was an easy top choice for me not because I'm from here, but also because I am going to be starting a family and what better place to do that than near family?! This program is also amazing in that it is unopposed with plenty of opportunities to grow; as well as a team filled with welcoming and wonderful people. My goal is to be able to establish a deep connection with my patients and educate on medical pathology, medications, and health. I have specific interests in lifestyle and sports medicine.

#### HOBBIES/INTERESTS

Besides being a parent to a human son, I am also a parent to 2 fluffy Samoyeds, and 1 bunny named Chubbard. I love gardening, crocheting, traveling, and anything related to the outdoors. I also have a specific interest for powerlifting so if I'm not at home or work, I'm at the gym!
