

HEART SAVER

A Program of The Heart Hospital
at Deaconess Gateway

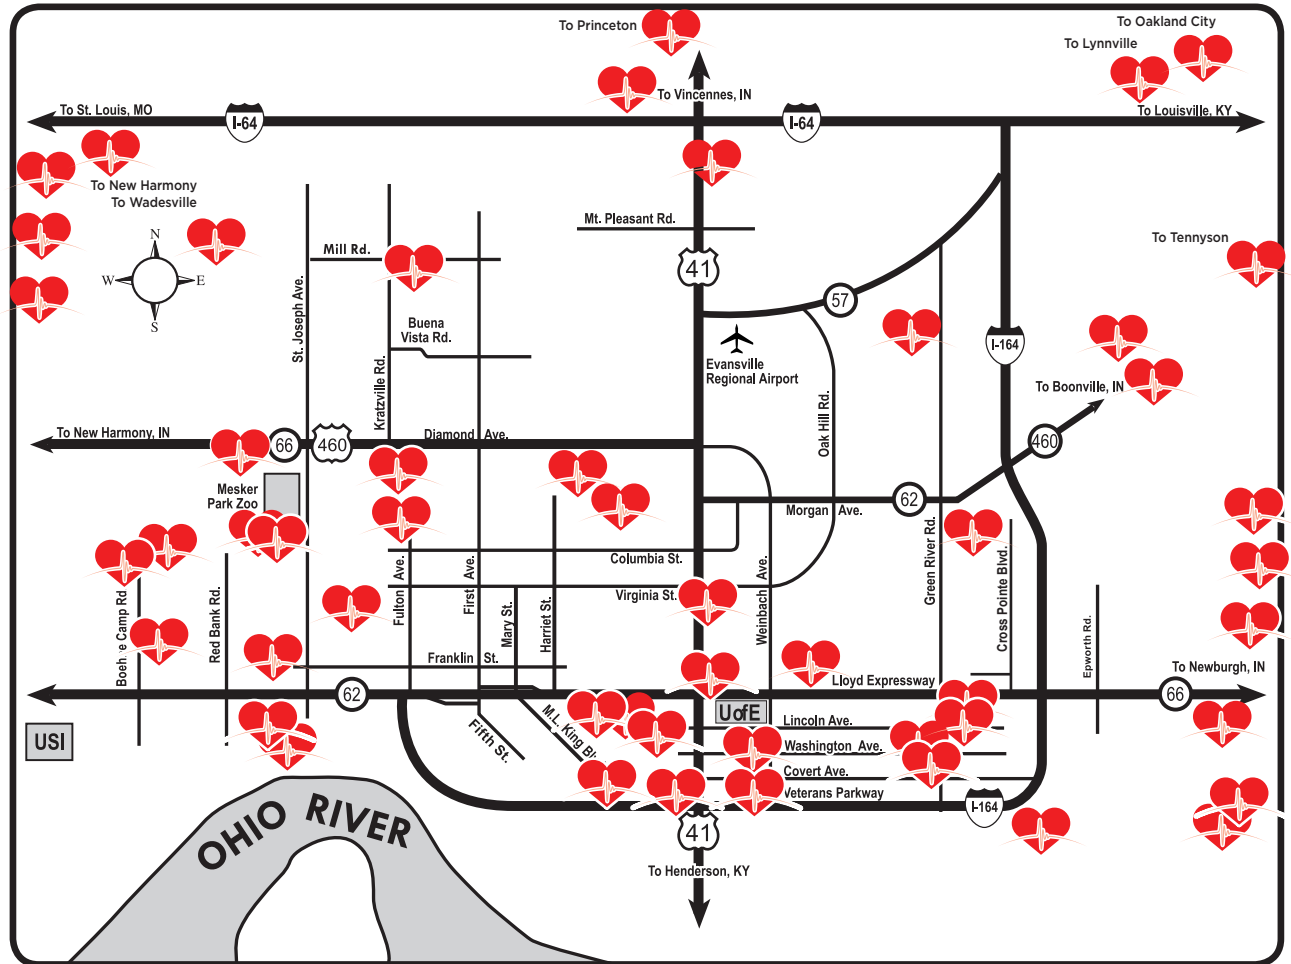

HeartSaver's mission: To reduce sudden death through placement of life-saving automated external defibrillators (AEDs) in the Tri-State.

Sudden cardiac death strikes without warning and chooses its victims at random, without regard to age, gender, health status or history.

We know AED's save lives. We can also be confident that the AEDs placed through this program will save a life. That life could be someone you know. It could be someone you love. It could even be your own life.

For more information on the HeartSaver program:
