

**Patient Name:**

Follow all instructions on your EGD instruction sheet.

Instructions for preparing for your study:

Please view the following educational video prior to arrival. This is a great resource that explains the procedure and what to expect during the study.

To watch the video, you can:

1. Scan the QR code shown below.
2. Search “Medtronic Bravo Patient Training Cartoon” on your smart phone or device.
3. If viewing instructions electronically, select the following hyperlink: “[Medtronic Bravo Patient Training Cartoon.](#)”

1. Do not take any antacids or anti-reflux medications during your Bravo study unless instructed by your doctor to do so.
2. Do not have an MRI during or for 30 days after your study is complete. If it is medically necessary to have an MRI, please let your physician know you had a recent Bravo Study and an X-ray will be needed to see if you have passed the Bravo Capsule.
3. Notify the office if you have an allergy to nickel.
4. If you have a pacemaker or defibrillator, please notify the office. This is a contraindication (i.e., you should not have the study).
5. You will be given a copy of instructions and a diary handout on the day of your procedure.
